International Seminar- An introduction

“Inclusion of Swami Vivekananda’s Ideas in the India’s National Education Policy – 2020”

The way Swami Vivekananda highlighted the characteristics of Indian culture while representing India at the Chicago Parliament of Religions; it elevated India's status on the world stage. This led to an unprecedented increase in curiosity about India and everything related to India among the learned society of Western countries. In Swami Vivekananda's vibrant vision of a prosperous and powerful India, he considered the education system of our country to be its basic foundation. He stated that education not only enables a person to face difficulties but also builds a person's character, makes them unselfish, and instills courage in them.

Today, as the National Education Policy - 2020 is being implemented across India, it is natural for questions to arise in the minds of many educationists, scholars, researchers, and students regarding whether the National Education Policy - 2020 incorporates the thoughts of Swami Vivekananda. If it does, to what extent, and under which points have his views been included in this policy? Additionally, has the kind of education system that Swami Vivekananda envisioned for building a capable India been adequately represented in our national education policy - 2020? This international seminar is being organized to address and discuss all these points.

The sub-topics of the seminar are as follows –

- **Moral Education**
- **Personality Development**
- **Equity, Equality, Harmony**
- **All Round Development**
- **Value Based Education**
